

Online Training

Asbestos Safety

The aim of this training course is to help you to understand the risks involved in working with asbestos and provide you with an introduction to the HSE 'good practice' guidelines for any work involving asbestos.

EazySafe are the experts in online safety training. Our courses are engaging and user-friendly while the platform offers **simplicity** and **flexibility** for both the learner and the trainer. Online training can be taken in advance or on-site. For more information on delivering inductions or other online training to your employees or contractors, please contact us for a trial.
